

BDockWidget

```
classDiagram
    class BDockWidget
    class CellDock
    class CellTypesDock
    class MapDock
    CellDock --|> BDockWidget
    CellTypesDock --|> BDockWidget
    MapDock --|> BDockWidget
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'BDockWidget'. Below it are three boxes: 'CellDock' on the left, 'CellTypesDock' in the center, and 'MapDock' on the right. A horizontal line connects the three bottom boxes. From each box, a vertical line goes up to this horizontal line, and then a single vertical line with an arrowhead points up to the 'BDockWidget' box, indicating that all three subclasses inherit from the base class.
